PROFILE

I'm a software developer with around fifteen years of professional experience across existing web, desktop and mobile systems, with a strong background in back-end development, databases, APIs and integrations and broad full-stack experience. My work has also included automated testing, data changes and following changes into production when needed. Since late 2023, teaching Information Technology has been my main professional work, while I've kept developing software. I'm now building an independent software practice alongside teaching and am available for remote contract or freelance work.

SOFTWARE EXPERIENCE

Manas Technology Solutions
2018–2023

Software Developer

Worked on existing web and mobile products across surveys, healthcare and online communities, in distributed teams working in English.

- Worked from product needs rather than prescribed implementations, collaborating with product owners on scope and estimates and defining technical approaches.
- Used automated testing and TDD extensively to understand existing behavior, reproduce bugs and make changes safely in complex existing codebases.
- Implemented database and data changes, including migrations and SQL, and followed selected changes through deployment and post-change verification.

Technologies: JavaScript, React, Elixir/Phoenix, TypeScript, Python

Mobile Streams
2011–2018

Software Developer

Worked on web and mobile systems for subscription, distribution and download of digital content, including APIs, integrations and SQL-backed application work.

Technologies: Android/Java, C#, ASP.NET, Angular, SQL Server

RVM Soluciones
2008–2011

Software Developer

Developed web and desktop applications, including logistics and distribution systems.

Technologies: C#, ASP.NET, Visual Basic, SQL Server

TECHNICAL EXPERIENCE

Development experience
Full-stack web development, Back-end and database work, APIs and integrations, Automated testing and TDD.

Selected technologies
JavaScript / TypeScript, SQL, C# / .NET, React, Node.js, Python, HTML/CSS, AWS, Git.

TEACHING

Information Technology teacher in Buenos Aires high schools and Head of IT Training for CFP No. 7's high school IT track since 2023. From 2019 to 2020, taught in UNAHUR's University Programming Technician program while working professionally in software.

EDUCATION

Universidad del Salvador
Information Systems Analyst
2017

Universidad de Buenos Aires
Several years of university study
Veterinary Medicine and Literature

IES Juan B. Justo
Pedagogical training for professionals and higher-level technicians
In progress · 12/15 units completed

Colegio Nacional de Buenos Aires
Bachiller
Pre-university high school, Universidad de Buenos Aires

CURRENT DEVELOPMENT

My current development work spans institutional tools, software for teaching and learning, and personal projects.
